

Smart cargo boxes
for light electric vehicles
and cargo bikes

Loadr.pro

Cargo boxes for last mile vehicles

Unmatched expertise in cargo box design and engineering

Our expertise lies in designing and manufacturing cargo boxes that seamlessly integrate with a wide range of last-mile delivery vehicles, including light electric vehicles, cargo bikes, bike trailers and other vehicles. We utilize cutting-edge materials, manufacturing techniques, and design principles to ensure exceptional durability, strength, and weather resistance, all while minimizing weight.

A commitment to quality and customer satisfaction

At Loadr.pro, we are committed to delivering the highest quality cargo box solutions, backed by exceptional customer service. We pride ourselves on our attention to detail, rigorous testing procedures, and unwavering commitment to meeting our clients' expectations.

Your trusted partner for last-mile delivery success

Whether you're a last mile vehicle manufacturer, dealer, or fleet manager at a logistics company, Loadr.pro is your trusted partner for innovative cargo box solutions. We empower businesses to optimize their last-mile operations, enhance efficiency, and deliver exceptional service to their customers.

Lightweight custom cargo boxes

A revolutionary approach

With our Loadr.pro Basic cargo boxes, we present a revolutionary system for constructing lightweight, customizable cargo boxes that redefine efficiency and versatility.

The essence of Loadr.pro Basic

Loadr.pro Basic is a modular system that utilizes lightweight honeycomb core panels in combination with our internally designed aluminum extrusions. This combination offers several distinct advantages for you:

- **Already developed**

No initial tooling costs for you.

- **Stock materials and in-house manufacturing**

Short time to market for you.

- **Minimized overall cargo box weight**

Optimal vehicle performance and maximized loading weight.

- **Modular system**

Tailored to fit any vehicle type, cargo volume, and operational requirements.

- **Durability and weather resistance**

Protecting cargo from the elements.

Seamless integrated custom cargo boxes

Engineered for optimal performance

Our aluminum sheet metal cargo boxes are not just about aesthetics; they are engineered to excel in the demanding world of last-mile logistics. We utilize high-grade aluminum and employ precision manufacturing techniques to ensure exceptional strength, durability, and weather resistance. These boxes can withstand the rigors of daily deliveries, keeping goods safe and secure.

Customized and cost-effective

Aluminum sheet metal cargo boxes offer a versatile and affordable solution for smaller cargo boxes, especially for 2-wheeled cargo bikes. Unlike EPP or plastic cargo boxes, aluminum sheet metal often requires minimal tooling and can be easily customized to fit various shapes and sizes.

Cargo boxes tailored to your vision

Where innovation meets collaboration

Loadr.pro stands out as a pioneer in co-engineering cargo box solutions. We recognize that every vehicle manufacturer has unique design visions and functional requirements. So, if our available cargo box systems do not meet your needs, we can take a collaborative approach, working closely with you to create a custom cargo box that perfectly aligns with your vehicle, brand identity and customer needs.

Cost-effective solutions with production efficiency

We understand that cost-efficiency is a critical factor in vehicle manufacturing. Our co-engineering process is designed to optimize production costs while maintaining the highest quality standards. Series production of the final design takes place in our modern factory, this way we keep a grip on an optimal end result, while design rights and tools of specifically designed parts and extrusions become your property.

Loadr.pro

Loadr.pro designs, engineers and manufacture cargo boxes for Light Electric (Freight) Vehicles, cargo bikes, bike trailers and more.

With a variety of cargo box systems and options, we offer the right cargo boxes for every type of last mile delivery vehicle. From cargo boxes with sliding doors and electric locks to insulated or refrigerated cargo boxes.
